

INDEPENDENT ACCOUNTANTS' REVIEW REPORT

TO THE MANAGEMENT OF THE CLOROX COMPANY

We have reviewed selected performance indicators (the “Subject Matter”) included in the accompanying Schedule of Selected Performance Indicators (the “Schedule”) and as identified by the “◆” symbol presented in The Clorox Company’s (“Clorox” or “the Company”) Annual Report and Executive Summary (the “Reports”) for the year ended June 30, 2016 or as otherwise noted, in accordance with the relevant criteria also presented in the Schedule. We did not review all information included in the Reports. We did not review the narrative sections of the Reports, except where they incorporated the Subject Matter. Clorox’s management is responsible for the Subject Matter included in the Schedule and as also presented in the Reports, based on the relevant criteria included in the Schedule (the “Criteria”). Our responsibility is to express a conclusion on the Subject Matter based on our review.

Our review was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform our review to obtain limited assurance about whether any material modifications should be made to the Subject Matter in order for it to be in accordance with the Criteria. A review consists principally of applying analytical procedures, making inquiries of persons responsible for the subject matter, obtaining an understanding of the data management systems and processes used to generate, aggregate and report the Subject Matter and performing such other procedures as we considered necessary in the circumstances. A review is substantially less in scope than an examination, the objective of which is to obtain reasonable assurance about whether the Subject Matter is in accordance with the Criteria, in all material respects, in order to express an opinion. Accordingly, we do not express such an opinion. We believe that our review provides a reasonable basis for our conclusion.

As described in Note 1, non-financial information is subject to measurement uncertainties resulting from limitations inherent in the nature and the methods used for determining such data. The selection of different but acceptable measurement techniques can result in materially different measurements. The precision of different measurement techniques may also vary.

Based on our review, we are not aware of any material modifications that should be made to the Subject Matter for the year ended June 30, 2016 or otherwise noted, in order for it to be in accordance with the relevant Criteria set forth in the table on the next page.
